

# Telephones Serie 250 for White Rooms

TLS250

## Description

- TLS250 is the latest model in the LELAS range of hands-free phones, taking advantage of the latest technical advances: it offers a high level of flexibility and ease of use thanks to the latest microprocessor technology. (Detection of variable programmable tones from 300 to 500 Hz) - Also works in line with reduced current (guaranteed up to 18mA)
- MRSA and other superbugs have tightened their grip on our hospitals, with the result that patients often study “league-table” before choosing a hospital for a procedure.
- The TLS250 range of hands-free and voiceless phones can be disinfected or washed as it is not dependent on the headphone or mouth contact for effective communication.
- Approved in the United Kingdom BAPT nº 504612 and in France ART nº 98656P.
- Availability in Analog (Optional DHCP VOIP POE SIP protocol)
- Optional WK026CRG card to open doors with passwords with DTMF keypad
- Optional WK087CRA over-amplification card for noisy environments

## Especificaciones

- Índice de protección IP66
- Tensión de línea de 12 hasta 48 Vdc
- Consumo de < 45mA
- Tensión llamada de 35 – 90 Vac
- Montaje Empotrado al Ras
- Señal acústica de 80 dB a 1m.
- Temperatura ambiente max/min: -25°C/+65°C
- Otras características: CCITT Q23
- Dimensiones de 180 x 260 x 57mm
- Peso de 1.6 Kg

# APPLICATIONS: Hospital White Rooms, Pharmaceutical Lab, Breweries, Refreshments and Food Factories, etc.

Hands Free Telephone  
for Hospitals

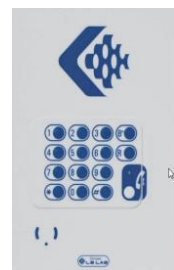

Compatible with any Central Telephone  
Exchange Analog or Digital
